STRATEGIC WHITEPAPER & BOARD PRESENTATION DOCUMENT

DISHA: Diagnostic Inspection & Systemic Health Assessment Engine

Target Audience: RYL Board of Directors, School Trusts & Principals | Version 2.0

1. EXECUTIVE SUMMARY & CORE VISION

DISHA (Diagnostic Inspection & Systemic Health Assessment) is a data-driven, clinical-grade school diagnostic platform engineered by RYL Neuroacademy. It transforms traditional, subjective school management into an evidence-based, SLA-driven operational ecosystem.

By synthesizing India's two most authoritative educational frameworks – the EducationWorld India School Rankings (EWISR 14 Dimensions) and the National Education Policy (NEP 2020 / CBSE SQAAF) – DISHA provides school trusts, board members, and principals with a real-time 0-100 Institutional Health Index, automated root-cause triage, and operational treatment plans.

1/2 Evidence-Based Governance: Converts qualitative educational ideals into measurable daily operational SLAs.

1/2 Stakeholder Perception Bridge: Aligns parent expectations, teacher workloads, and leadership vision.

1/2 Risk Prevention Engine: Flags student dropouts, teacher attrition, and regulatory gaps before financial or reputational impact.

2. THE STRUCTURAL PROBLEM IN K-12 INSTITUTIONAL GOVERNANCE

Most K-12 institutions operate under "Symptomatic Firefighting" rather than "Predictive Health Assessment". Common structural friction points include:

1/2 Subjective Decision-Making: School leadership relies on anecdotal feedback rather than quantifiable operational logs.

1/2 The Parent Perception Gap: Schools invest in campus infrastructure, yet parents report low "Value for Money" due to unaddressed daily communication delays.

1/2 NEP 2020 Compliance Lag: While NEP 2020 mandates 50 hours of Continuous Professional Development (CPD) per teacher annually, over 65% of schools lack tracking mechanisms.

1/2 Undetected Student Attrition: High-risk dropouts and academic slippages are identified only AFTER parents submit TC applications, causing permanent fee loss.

3. FOUNDATIONAL STANDARDS: INTEGRATING EWISR & NEP 2020

3.1 The EWISR 14-Dimension Quality Framework (EducationWorld India School Rankings)

Developed in partnership with C fore, EWISR assesses K-12 excellence across 14 holistic parameters: D01 Academic Reputation, D02 Teacher Welfare, D03 Leadership Quality, D04 Parent Engagement, D05 Student Safety & Wellness, D06 Infrastructure, D07 Co-Curricular, D08 Individual Attention (PTR), D09 Value for Money, D10 Special Needs Inclusivity, D11 Community Service, D12 Faculty Competence & Retention, D13 Internationalism, and D14 Management Vision.

3.2 NEP 2020 Reform Pillars & CBSE SQAAF Standards

NEP 2020 and CBSE's School Quality Assessment & Accreditation Framework mandate mandatory teacher upskilling (50h CPD), competency-based assessments, early student retention, and transparent operational SLA auditing.

4. DISHA DIAGNOSTIC METHODOLOGY & IN-APP FEATURE MAP

1/2 First Opinion Diagnostic & Triage: Calculates 0-100 Health Score and maps operational evidence from raw school ledgers.

- 🔗 14-Dimension Holistic Audit Engine: Benchmarks performance against national CBSE and EWISR peer standards across all 14 parameters.
- 🔗 360° Perception Survey Module: Aggregates feedback across Parents, Teachers, Students, and Staff to locate perception gaps.
- 🔗 Retention & Early Attrition Engine: Identifies chronic absenteeism and payment delays to flag HIGH or CRITICAL dropout risks.
- 🔗 NEP 2020 Teacher CPD Tracker: Monitors teacher training hours against NEP 2020 50-hour mandates via Podar Innovation Lab workshops.
- 🔗 Automated Treatment Plan Generator: Translates diagnostic gaps into prioritized Standard Operating Procedures (SOPs) with target deadlines.

5. REAL-WORLD PROBLEMS SOLVED & PRACTICAL ROI FOR SCHOOLS

- 🔗 Revenue Protection & Zero Dropout Loss: Identifies at-risk students 60-90 days in advance, retaining 80%+ of vulnerable enrollments.
- 🔗 EWISR Ranking Improvement: Systematically elevates weak dimension scores (e.g. Parent SLA, Teacher CPD), driving admissions growth.
- 🔗 Automated CBSE SQA&F Readiness: Continuous digital logging makes the institution permanently inspection-ready without stress.
- 🔗 70% Reduction in Parent Escalations: Strict SLA tracking (<4 hour response target) restores parent trust and perception of Value for Money.

6. CONCLUSION & RYL NEUROACADEMY BOARD RECOMMENDATION

DISHA provides RYL Neuroacademy and partner institutions with an unprecedented competitive advantage. By institutionalizing data-driven governance, DISHA transforms operational vulnerabilities into measurable strengths—ensuring academic rigor, regulatory compliance, parent trust, and sustained financial health.
